System Update Notice: New Application Tab & Prefilled PDF Forms

We are rolling out a system update to streamline the submission process on the TTBDO website through the new **Application** and **My Applications** tabs.

Automated PDF Generation & Preview

Applicants filling out forms via the new **Application** tab will have their data automatically populated into the official PDF forms upon submission, allowing them to instantly access both a **preview button** and a **download button** for the prefilled documents.

- **Sample Preview Feature:** The system will display a working sample or preview of the prefilled forms using the reference PDF provided by the office, allowing applicants to check the layout before finalizing.
-

Pre-Submission Confirmation Message

Before clicking submit, applicants will encounter a confirmation prompt stating:

> *"By submitting, you confirm that all information provided is correct. This data will be used to automatically populate your application forms. Please note that entering incorrect information will result in incorrect details on your generated forms."*

Post-Submission Edits via "My Applications"

If an applicant discovers an error after submission, they can update their information through the **My Applications** tab using the edit button associated with each specific project or application.

- **One-Time Edit Limit:** Each application can only be edited **ONCE**. Once the edit has been saved, the edit button will be permanently disabled for that application.
-
- **Re-download Prompt:** Upon submitting an edit, a notification will appear displaying the prompt: **"REDOWNLOAD PREFILLED FORMS?"** so applicants can grab the updated PDF documents via the updated preview and download options.
-

Wet Signature Requirement

Both within the initial application view and during the post-submission edit process, a prompt will remind users:

> *"Generated forms must be printed and submitted to the TTBDO office with an original wet signature."*
