## COMMENTS & REVISIONS

### 1. GLOBAL FEATURES (Applies to All Pages & Users)

- **System Branding:** Integrate the TTBDO logo, the UPLB logo, and the SULONG logo consistently across the entire system.
- **Email Notifications:** Ensure that *every* action performed on the platform triggers an automatic email notification to the relevant parties.
- **View Folder Automation:** The "View Folder" button must be clickable across all portals. Do not require manual Google Drive link insertion; the folder creation and linking must be fully automated upon the applicant's initial submission.
- **Request & Response History:** The communication history (requests and responses) must open in a slide-out sidebar interface, similar to the existing remarks sidebar. This applies to the Applicant, Case Handler, and Admin portals.
- **Detailed IPOPHL Steps:** Retain the detailed IPOPHL steps in the Prosecution stage for all users so they can manually check and view the progress.
- **Project and Royalty Page:** Remove the standalone "Projects and Royalty" section entirely for all users.

### 2. ADMIN VIEW

- **Home Page:**
    - Configure the calendar to *only* display deadlines.
    - Keep the "My Cases" card, and add "Overdue Cases" and "Upcoming Deadlines" cards.
    - Remove the "Needing Response" and "New Assignments" cards.
- **Analytics Tab:**
    - Remove the "Prosecution / Filed" metrics card and replace it with a "Completed" card.
    - Remove the "Prosecution / Filed per Month" bar graph entirely.
    - Make the "Applications Received per Month" graph smaller to place more visual emphasis on the main pie chart.
- **Unassigned Cases Tab:** In the "View Details" popup, include a short description of the case (similar to an abstract).
- **Deadline Extensions:** When an Admin extends a deadline, the system must show a confirmation prompt that says: *"Confirm extension?"*

### 3. CASE HANDLER VIEW

- **Home Page:**
    - Configure the calendar to *only* display deadlines.
    - Keep the "My Cases" card, and add "Overdue Cases" and "Upcoming Deadlines" cards. (Remove the "Needing Response" and "New Assignments" cards).

    - Ensure that clicking any warning or info notification on the homepage redirects the handler directly to the corresponding case card in the Pre-Protection or Prosecution tabs.
- **Prosecution Tab (Patent Downgrade):** During the "Substantive Examination" step for a Patent, clicking the step must trigger a prompt allowing the handler to indicate whether the application will be downgraded to a Utility Model (UM). *Note: This downgrade capability is restricted to Case Handlers only; Admins should not have this option.*
- **Completed Cases Tab:** Ensure that the case cards in this tab default to the "Compact" card style.

**4. APPLICANT / USER VIEW**

- **Notifications:** * Update the notification icon design so it perfectly matches the icons used in the Admin and Handler portals.
    - Ensure that clicking a notification (e.g., a sample notification) routes the user directly to the specific case card in question.
- **Resources Page:** Copy the UI design of the "Address Card" from the Homepage and place it on the Resources page for consistency.
